PROFESSIONAL PROFILE

Full Stack Developer with proven experience building and deploying end-to-end web and mobile applications. Led the development of 3 hybrid mobile apps (Ionic/Angular) released to Google Play and App Store, implemented NestJS microservices with MongoDB and Redis, and delivered multiple backend systems in .NET and PHP featuring JWT authentication, role-based access control, and full CRUD functionality. Works effectively in high-demand environments managing multiple simultaneous projects with end-to-end ownership: from architecture design to production deployment.

PROFESSIONAL EXPERIENCE

Full Stack Developer | **Cube Lab S.A.S.**

May 2025 – Present • Granada, Meta, Colombia • Remote

- Led the full development of Taxiya, a taxi-hailing app (Ionic/Angular + NestJS), published on Google Play with a microservices architecture and dynamic fare calculation by geographic zone.
- Published Conecta (somosconecta.com.co) on Google Play and managed its Apple App Store submission: Capacitor integration for iOS, Xcode signing, App Store Connect listing, and successful submission.
- Designed and implemented a route and fare management module with JWT-protected endpoints and soft-delete support, reducing operational setup time by 60%.
- Built a bulk payment automation tool for Android (NDA): reads from Excel, updates statuses, and automatically stores payment receipts in the cloud.
- Implemented error detection and handling in automated payment flows, increasing the success rate of transactions processed without manual intervention.
- Developed multiple RESTful APIs with .NET Core and NestJS (npm workspaces monorepo), documented with Swagger and managed in Azure DevOps under Git Flow.
- Implemented JWT authentication with ASP.NET Identity (roles, claims, refresh tokens) on platforms with more than 3 differentiated user profiles.

Full Stack Developer | **Grupo Empresarial GB**

2022 – 2025 • Pamplona, Norte de Santander • Remote

- Developed and maintained responsive web applications for casaclick.co and vichadaaldia.co, ensuring continuous availability and optimal performance.
- Built custom WordPress plugins to optimize CRM workflows for non-technical teams.
- Designed and implemented eCommerce stores focused on UX and mobile/desktop accessibility.
- Created high-conversion landing pages for digital marketing campaigns with forms and analytics integration.

FEATURED PROJECTS

TAXIYA + CONECTA — Ionic/Angular + NestJS + Capacitor

- Taxiya: taxi-hailing app published on Google Play (production). NestJS microservices with geographic fare calculation.
- Conecta (somosconecta.com.co): published on Google Play and App Store. iOS via Capacitor + Xcode signing + App Store Connect + Apple Developer Program enrollment.

MAYORISTA KAI — ASP.NET Core + Angular/Ionic

- Wholesale e-commerce platform with JWT authentication, product catalog, anonymous session cart, order flow with receipt generation, wishlist, moderated reviews, and SMTP password recovery.

MIZAP — Me Importa un Zapato — Ionic/Angular + .NET Core

- Footwear laundry service app with 4 differentiated roles, delivery driver commission system, logistics module with Mapbox, glassmorphism-design dashboard, and reporting module.

CLUBMINER — PHP / MySQL

- Crypto investment platform with PSE, credit card, and NowPayments integration; scheduled investment campaigns; multi-level bonus system; and bulk payment processing.

TECH STACK

Frontend	Angular, Ionic Framework, TypeScript, HTML5, CSS3, SASS, Vue.js
Backend	NestJS, .NET Core / ASP.NET Identity, C#, Node.js, PHP, Python
Databases	MongoDB, SQL Server, MySQL, Firebase, Redis
Mobile / DevOps	Capacitor, Xcode, Google Play Console, App Store Connect, Appium, Playwright
Tools	Git, Azure DevOps, Swagger, Postman, Mapbox, Google Drive API, Vercel, WordPress

EDUCATION

Technologist in Network and Teleinformatics Systems Management

Instituto Superior de Educación Rural ISER, Pamplona • 2024

High School Diploma

Institución Educativa COLGUICOBÁ • 2018
